# Bug Hunter 1

The bug police has heard of your remarkable skills as a Python programmer.

They have recruited you as a bug hunter to help them find and fix bugs in their code.

Task

Find the bug in the following code:

```python
def calculate_area(radius):
    pi = 3.14
    area = pi * raidus ** 2
    return area

print(calculate_area(5))
```

Guidelines

- Use the strategies learned in Debugging lesson:
    - Reading the error
    - Debugging with print statements
    - Rubber duck (explain your problem to someone or something)
    - Debugging with `pdb`

Submission

Fixed code, with the fixed line explained with a comment.
